المراجع المراجع

The applicant's information disclosure statement (paper #5) has been considered and a copy has been placed in the file.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 5, the phraseology "second flange portions defining and outer surface" is not readily understood by the Examiner. In claim 1, line 12, it appears that "such" should be –said--. In claim 9, line 9, there is a lack of antecedent basis for "said flange portions". In claim 9, line 12, it appears that "body" should be –cover--. In claim 15, line 12, it appears that "such" should be –said--. In claim 18, lines 1-3, the claim is rejected as further limiting the subject matter as being the exact same language as claim 17.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 and 9-19 are further rejected under 35 U.S.C. 102(e) as being anticipated by Vance ('859). Vance ('859) discloses a two-piece weatherstrip for a motor vehicle comprising a cover (30) having a first flange (32), a second flange (38),

Application/Control Number: 09/717,767

Art Unit: 3634

and a centrally disposed web (40), a body having a first slot (40) and a second slot

(56), an S-shaped metal insert (44), and a pair of wiper lips (74 and 84) having flocking

attached thereto.

Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35

U.S.C. 112, second paragraph, set forth in this Office action and to include all of the

limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. U.S. patent to Kaye et al. disclose a weatherstrip and cover

similar to that of the applicant's invention. U.S. patent to Heller discloses a weatherstrip

and cover similar to that of the applicant's invention. U.S. patent to Vance ('840)

discloses a weatherstrip and cover similar to that of the applicant's invention. U.S.

patent to Vering discloses a weatherstrip and cover similar to that of the applicant's

invention.

Any inquiry concerning this communication should be directed to Jerry Redman

at telephone number 703-308-2120.
